

Membership

Boundaries for reporting	None prescribed, although reporting emissions for one state/province and/or transitional reporting, and ultimately North American reporting, is encouraged.
Reporting methods	Members are required to use The Registry's protocols to quantify their emissions; where The Registry does not have reporting requirements, industry best practices must be used and specified.
Verification	Not required, although it is encouraged to ensure the credibility of data.
Reporting	<p>Member data will not be published on The Climate Registry website.</p> <p>However, members may publish their GHG data on their own company websites and may indicate they are a Climate Registry Member. They can use The Climate Registry logo, except with respect to their data.</p> <p>The Climate Registry will have a page dedicated to Registry Members, with hyperlinks back to the company websites.</p>
