

## Other Program Recognition of Verification Bodies

The Climate Registry requires that its Members have their GHG emissions reports verified by American National Standards Institute (ANSI)-accredited, Registry-recognized Verification Bodies before The Registry will make the Member's report available to the public. The Registry also has provisions for Members to use the services of applicants of ANSI's GHG accreditation program (ANSI Applicants), since these firms must secure at least one client in order to fulfill their accreditation requirements; however, The Registry will not publicize emissions reports verified by ANSI Applicants until they have achieved accredited status.

The Climate Registry has developed this table to assist its Members in identifying Verification Bodies that are eligible to conduct verifications for The Climate Registry as well as additional programs in which they participate. A Verification Body's recognition by multiple programs apart from The Climate Registry does not necessarily mean that the Verification Body is more competent, but rather that the Verification Body is eligible to conduct verifications for these other programs.

To the best of our knowledge, this information is current as of May 25, 2011; however, Members should always confirm a Verification Body's qualifications before contracting their services. The Climate Registry periodically updates this resource based on the American National Standards Institute (ANSI), California Air Resources Board (CARB), and Massachusetts Department of Environmental Protection (MassDEP) online directories. The Climate Registry will also update this resource to reflect notifications of status changes as provided by Verification Bodies and confirmed with the applicable program.

Verification Body (VB) Name	ANSI Applicant (seeking Registry-recognition)	ANSI-Accredited / Registry-Recognized (see ANSI website for sector- specific accreditation)	CARB-Accredited (see CARB website for sector- specific accreditation)	MassDEP-Recognized
<b>ANSI-Accredited Registry-Recognized VBs</b>				
Advanced Waste Management Systems, Inc. (AWMS)		X		X
Alliant Environmental, LLC		X		
Bureau Veritas Certification North America (BVCNA)		X	X	X
Cameron-Cole, LLC		X	X	X
Complete Integrated Certification Services Ltd (CICS)		X		X

<b>For Contact Information for ANSI Applicants</b>				
*Note that all ANSI applicants seeking Registry-recognition may conduct a verification for a Member of either The Climate Registry or the California Climate Action Registry (CCAR) for purposes of fulfilling their ANSI witness assessment requirement; however, neither registry will publicize your emissions report until the firm has achieved accredited status. ANSI applicants must complete a witness assessment in order to become accredited.
