PRESS RELEASE

The Climate Registry Appoints Ann McCabe as Interim Executive Director

LOS ANGELES, California – May 31, 2017 – The Climate Registry today announced that Ann McCabe has been named interim Executive Director effective June 1st. The Climate Registry (TCR) is a California-based nonprofit that develops tools for measuring and verifying reductions of greenhouse gases (GHGs) contributing to climate change. TCR is governed by the majority of U.S. states and Canadian provinces.

Ms. McCabe recently finished a five-year term as a utility regulator at the Illinois Commerce Commission. She has a long history with TCR: she served as a board and executive committee member over the past two years and as TCR's Midwest Regional Director from 2008-2010. During her time at the Illinois Commerce Commission, Ms. McCabe was president of the MidAmerica Regulatory Conference (MARC), a group of 14 state utility commissioners. She is a past president of the Organization of PJM States, Inc. board, and former chairman of the National Association of Regulatory Utility Commissioners' (NARUC's) Nuclear Issues Subcommittee. Prior to these roles, Ms. McCabe managed environmental regulatory issues for BP and Amoco, and consulted to industry, trade associations and nonprofits.

“We are tremendously fortunate that Ann was available to join The Climate Registry at such an important time for sub-national and corporate leadership on climate change,” said Mary Nichols, Chair of the California Air Resources Board (CARB) and a TCR board member. “Her extensive experience, coupled with her deep understanding of the organization, will ensure that TCR continues to be a valuable resource and partner to companies and governments in North America and beyond.”

"I’m delighted to return to The Climate Registry,” said Ms. McCabe. “With states, cities and the private sector stepping up to fill the leadership gap in U.S. climate action, TCR plays a key role in assuring that voluntary efforts get proper credit. I look forward to working with the fantastic TCR team and our many partners to expand our efforts so we can have even more impact.”

TCR will move to appoint a permanent Executive Director later in the year.
About THE CLIMATE REGISTRY
The Climate Registry (TCR) is a non-profit organization governed by U.S. states and Canadian provinces and territories. TCR designs and operates voluntary and compliance GHG reporting programs globally, and assists organizations in measuring, reporting and verifying (MRV) the carbon in their operations in order to manage and reduce it. TCR also builds GHG MRV capacity in sub-national and national governments, and is spearheading innovative new projects such as the National Energy Efficiency Registry (NEER) and water-energy GHG guidance.
